

Importing Records from PubMed into RefWorks 2.0

1. After running your search, click on **Send To**, select **File** and set format to **MEDLINE**. When prompted save file.

The screenshot shows the PubMed.gov website interface. At the top, there is a search bar with 'PubMed' in the dropdown and 'electronic health records canada' in the input field. A 'Search' button is visible. Below the search bar, there are links for 'RSS', 'Save search', 'Limits', 'Advanced search', and 'Help'. The main content area displays search results for 'electronic health records canada', showing two results. A 'Send To' dialog box is open on the right side of the screen, with the 'File' option selected and the 'Format' set to 'MEDLINE'. The dialog box also shows 'Download 328 items' and a 'Create File' button.

2. In RefWorks, go to **References/Import**.

The screenshot shows the RefWorks interface. The top navigation bar includes 'References', 'View', 'Search', 'Bibliography', 'Tools', and 'Help'. Below the navigation bar, there are several buttons: 'Add New', 'Import', 'Export', 'Create Bibliography', and 'New Reference'. The 'Import' button is highlighted with a red circle. Below the buttons, there is a section for 'References' with options for 'References to Use' (Selected, Page, All in List) and a 'Sort by' dropdown menu set to 'Authors, Primary'. The main content area displays 'No references found.'

3. Set *Import Filter/Data Source* on **NLM PubMed** and *Database* on **PubMed**. Click on **Browse** to locate the file containing your *PubMed* records. Select the folder you wish to import the records into. Click on *Import*.
